

Zip2Tax Evolution Table Layout Information

Country – This field will always be US

State – A two letter abbreviation for the state.

ZIP – (Zone Improvement Plan) code; a system of 5-digit codes that identifies the individual post office or metropolitan area delivery station associated with an address.

Tax – The combined state, county and local taxes associated with a ZIP code.

*Note: Some ZIP codes have more than one tax rate. The Evolution store only allows one tax rate per ZIP, so this table defaults to the tax rate within the ZIP code at the location of the U.S. Post Office.
