

Zip2Tax Magento Enterprise Table Layout Information

Code – A Magento code with abbreviations for: country, state, ZIP Code, and Rate1 inside double quotes. Ex: “US-NY-00501-Rate1”

Country – A two letter code for country. Ex: “US”

State – A two letter abbreviation for the state. Ex: “NY”

ZIP/Post Code – (Zone Improvement Plan) code; a system of 5-digit codes that identifies the individual post office or metropolitan area delivery station associated with an address.

Rate – The percentage of the total sales price to be remitted as tax.

Magento Enterprise differs from the free version in that it requires 5 additional columns to make it import correctly. The following columns are present in this table, but are purposely blank (have no data in them).

Zip/Post is Range – Blank

Range From – Blank

Range To – Blank

Default – Blank

default_1 – Blank
